CERTIFICATE

CLIMATE CONTRIBUTION

KAURI CAB Group Berlin

CERTIFICATE NO.	DATE OF ISSUE	VALID UNTIL
DE-2800-1221	21.12.2020	06.04.2025

CONFIRMATION OF THE CLIMATE CONTRIBUTION

For the stated amount of 195 tonnes of CO_2, certificates from recognised climate protection projects were purchased and officially retired.

The purchase and retirement of these certificates enable the financing and implementation of the named climate protection projects.

By supporting these verified projects, KAURI CAB Group Berlin makes a voluntary contribution to global climate protection.

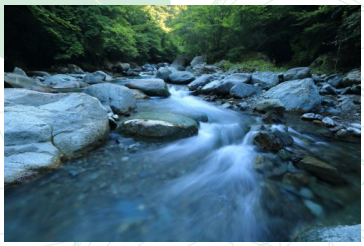

The purchase and retirement of the certificates support the climate protection projects listed in the annex:

Dipl.-Ing. Frank Huschka

Climate Extender GmbH
Managing Director

CLIMATE EXTENDER

KAURI CAB Group Berlin supports the following climate protection projects:

LAS PIZARRAS Hydroelectric PROJECT

Peru

Standard: Verified Carbon Standard (VCS)

The Las Pizarras Project in Peru is a new run-of-river hydroelectric power project located at approx. 1,078 m.a.s.l, on the high basin of the Chancay river, in the district of Sexi, province of Santa Cruz, region of Cajamarca, in Peru.
The total installed capacity of the Project will be of 18 MW, with an electricity generation potential of 103.32 GWh per year. The Project aims to generate renewable electricity by using water from the Chancay river and supply this energy to the National Interconnected Electric Grid (SEIN).The Project will have an expected minimum operating lifetime of 40 years.
The Project is expected to avoid the emission of 68,132 tons of carbon dioxide equivalent (tCO2e) per year, which will amount to 681,323tCO2e for the first crediting period of 10 years.

Estimated Annual Emission Reductions
68,132 t CO2

TOYOLA Promoting Improved Cooking practices

Nigeria

Standard: Gold Standard

The project involves manufacturing and distribution of efficient charcoal cookstoves that would replace the inefficient cookstoves currently being used in the host country of Nigeria. The project will help thousands of families, small and medium commercial entities in Nigeria and will reduce the Green House Gas emissions.

The project activity involves replacement of existing in-efficient cookstoves being used by majority of Nigerian population with highly efficient Toyola Cookstoves.

Over 71% of Nigeria's population, mainly poor people, cooks with solid fuel in inefficient traditional Cookstoves and open fires resulting in serious indoor air pollution. Due to this, Nigeria records the highest number of indoor air pollution related deaths, averaging 64,000 annually, especially among women and children in poor families (Source: Clean Cooking Alliance). This is why Toyola Cookstoves is primarily target at the majority, the poor part of the population.

The project described here will reduce greenhouse emissions by disseminating fuel-efficient charcoal stoves. The project is based on work by Toyola Energy Limited (TEL) in clean cookstoves space over past 10 years in various parts of Africa. TEL was established in 2003. It is owned and managed by highly educated and trained entrepreneurs. TEL was part of 50 informal metal artisans selected and trained by EnterpriseWorks Worldwide to fabricate the "GYAPA" charcoal efficient cook stoves.
